

To start the application please go to the `ElectronicStoreApplication` class and click on the green triangle shown in the image below. You will see the application urls and active profiles information down below.

You will need token to call the admin end points:

POST /deal/{type}	<--- create deal
POST /product	<--- create products
PUT /product/{productId}	<--- remove product

Please login as an admin with the following end point and credentials:

POST /admin/login

username: admin  
password: admin

This end point will provide a UUID token in response, please put this token in the header with key of "token":

"token": "c08c052a-e0f8-4185-8685-f061f66bea41"
